Index to InTech, Vol 30, 1983

PUBLISHED ARTICLES

Article list	Month/Page
Refrigeration and Cooling: Hot for Savings	1/9
Computerizing the Utilities: Leadership from the Top	1/35
Short Courses: Missing the Mark	1/35
Computer Cuts Steam Cost by $1.3 Million	1/43
Field Instruments: Needs and Developments for the Gas Industry	1/47
Installation and Checkout: Buy Now, Pay (Dearly) Later	1/51
Process Monitoring in Hazardous or Inaccessible Environments	2/9
Better Process Performance: Not on the Data Sheet	2/19
Instruments and Safety: Surveying Cause and Effect	2/25
Nuclear Qualification of Instrumentation: Benefits to the Processing Industries	2/31
Improve the Reliability of Your Rotating Machinery: It's an Instrument Department Responsibility	2/35
Minimum Bypass Flows for Boiler Feed Pumps: They're Higher Than You Think	2/41
Instrumentation Training: A New Alternative	2/83
Microprocessor-Based Control: Turning the Corner, Turning the Turbines	3/9
Digital System Reliability and Maintenance: Users Are Sold	3/29
Circle 600 and Sit Tight	3/30
Hierarchical Distributed Control: Progress and Needs	3/45
A Distributed Programmable Controller System for Batch Control	3/53
Security Functions in Distributed Control: Vendor and User Responsibilities	3/57
Microprocessors for Control and Instrumentation: Limitations and Progress	3/61
Flow Measurement: Some Recent Progress	4/9
The Pulp and Paper Industry: Facing the Problems	4/23
Guide to Selecting Pressure and Differential Pressure Transmitters	4/31
Don't Overlook Simple Regulators for Complex Fluid Control Jobs	4/51
Elastomer Coatings: Hope for Cavitation Damage Resistance	4/55
Improving Your Open Channel Flow Measurements	4/61
Infrared and Photoionization Detectors for Chromatographic Characterization of Complex Mixtures	4/65
Pressure Sensing: Continuing Improvements	5/9
Lasers for Flame Monitoring: Seeing the Light	5/28
Batch Process Control: Likely Impact of Emerging Technologies	5/39
Batch Automation: Programmable Controllers or Process Computers?	5/43
Fiber Optics: Ready for Industry	5/51
Fiber Optics: New Sensors for Old Problems	5/57
Laser-Based Instrument Patents: Still Ascending the Learning Curve	5/63
What's Available in Temperature Standards	6/7
How to Save a Batch: Climb Ladder or Wind Clock	6/17
Guide to Selecting Non-Contact Temperature Instrumentation	6/23
Carbon Monoxide Monitoring Saves $60,000 Annually	6/43
Energy Optimization: Managing Resources in a Large Industrial Powerhouse	6/47
Mux and Money: Can You Get More for Less?	7/9
Manufacturers' Specifications: Fact or Fantasy?	7/23
A National Policy to Solve the Engineering Shortage: More Money	7/31
Data Acquisition Systems: The Microprocessor Revolution	7/45
Sensors for Cryogenic Thermometry	7/53
Laser Instrumentation: Analytical Uses Are Growing	7/59
ISA and Education: A Status Report	7/85
Temperature Instrumentation: Recent Patent Activity	8/7
Experience: It Teaches What We Want to Be Taught	8/29
Monitoring Air Quality: More Than Buying an Analyzer	8/33
Closed Circuit Television: Cost-Effective Communications for Industrial Plants	8/45
When We Say It's Accurate, It's Accurate . . . Or Is It?	8/49
Instrumentation '83: An Industry in Transition	9/7
News Item: High-Tech Park Planned for West Overshoe KS; Proximity to Post Office Cited as Incentive	9/43
Necessary . . . or Nice	9/44
Progress and Politics: UNISPACE '82	9/50
Specifying Critical Components for Fiber Optics Data Collection Systems	9/79
Automation and Power Plant Availability: Significant Savings Potentials	9/87
Proway: The Evolving Standard for Process Control Data Highways	9/91
Optimizing Wood/Oil Exchange for a Combined-Fired Hog Fuel Boiler Saves $360,000 Annually	9/97
Plant-wide Automation: Do You Need It?	9/103
Control System Integration: The Shape of Things to Come	9/109
Advances in Instrumentation: Where We Are, Where We're Going	9/113
On-Stream Analyzers: Progress with New Technologies	10/9
Free Engineering: A Time-Honored Tradition	10/27
Process Chromotography: Difficult Becomes Routine	10/34
Image Processing: Getting Ready for Industry	10/45
Validating Analyzer Data: An Approach to On-Line Process Performance Evaluation	10/49
Automated Calibration: Better Accuracy at Lower Cost	11/9
Redundancy: Do Two Wrongs Make a Right?	11/33
Automate Your Instrument Maintenance with a Personal Computer	11/41
Modular Construction: The Price of Savings	11/45
Standardizing Modules for Pre-Assembled Instrument and Control Packages	11/49
The Year in Review: A report by 1982-1983 President Leslie M Zoss	11/83
Batch Production: Alive and Well in the Processing Industries	12/9
What a Friend We Have in PCs	12/31
Guide to Selecting Programmable Controllers	12/37
Process Computers: You Ain't Seen Nothing Yet	12/47
Do Robots Belong in Process Plants?	12/51
The ISA Presidency: Max J Kopp on Emphasizing Individual Opportunities	12/77

TOPIC INDEX

Topic index	Month/Page
accuracy	8/49, 11/9
acoustic flowmeters	4/9
air quality monitoring	8/33
alarms	3/57
analytical instruments	4/65, 5/63, 10/9
artificial intelligence	5/39
batch digesters	12/9
batch process control	3/53, 5/39, 5/43, 6/17, 12/9, 12/37, 12/51
boiler control	1/43, 6/47
boiler feed systems	2/41
boiler optimization	6/43, 9/97
calibration	11/9, 11/41
carbon monoxide monitoring	6/43
cavitation	2/41, 4/55
CCTV	8/45
checkout	1/51
chiller control	6/47
chromatography	4/65, 10/34, 10/49
combustion efficiency	6/43
combustion monitoring	5/28
communications	5/51, 8/45, 9/79, 12/47
composition analysis	7/59, 8/33
compressor control	6/47
computed tomography	10/45
concentration measurements	1/47
control strategies	2/19
cost savings	9/87
cryogenic thermometry	7/53
data acquisition	7/45, 9/7, 9/79
data highways	9/91
data sheets	7/23
data transmission	5/51, 8/45
data validation	10/49
deadweight testers	8/49
dedicated computers	9/109
differential pressure transmitters	4/31
digital control	1/35, 1/43, 1/51, 3/9, 3/45, 3/61
digital systems	3/29
dimensional gaging	5/63
displacement sensing	5/57
distributed control	3/45, 3/57, 9/87, 9/91, 9/103, 9/109, 12/47
documentation	9/109
education	1/35, 2/83, 7/31, 7/85, 9/7, 11/83, 12/77
efficiency	1/9
elastomeric coatings	4/55
electro-optics	5/63, 9/113
energy generation	1/35, 3/9
energy management	1/9, 1/43, 6/47, 9/97, 9/103, 9/113
energy savings	2/41
engineering shortage	7/31
environmental protection	8/33
error detection	3/57
fiber optics	5/51, 5/57, 9/7, 9/79
field instrumentation	1/47
flame monitoring	5/28
flow bypass control	2/41
flow instrumentation	9/7
flow measurement	4/9, 4/51, 9/113
flumes	4/61, 10/34
gas distribution instrumentation	1/47
graphic displays	9/7
hazardous environments	2/9
hierarchical control	3/45
hog fuel	9/97
hydrocarbon determinations	4/65
image processing	10/45
inaccessible locations	2/9
infrared detectors	4/65
infrared thermometers	6/23
installation	1/51, 7/9, 11/45, 11/49
instrument assembly	2/35, 11/45
instrument engineering	2/19, 4/23, 8/29, 9/113, 10/27
instrument maintenance	11/41
instrument specification sheets	7/23
instrument testing	2/31
instrumentation technology	9/7
intrinsic safety	2/25
ladder diagrams	12/37
laser Doppler velocimeters	4/9
lasers	5/28, 5/63, 7/59
leak detection	1/47
level instrumentation	9/7
linear programming	6/47, 10/34
machinery protection	2/35
magnetic flowmeters	4/9
maintenance aids	9/7
maintenance	3/29
man/machine interfaces	3/45
management	1/35
methanol	4/65
microcomputers	12/47
microprocessor-based control	3/9
microprocessors	3/61, 7/45
modular construction	11/49
modularization	11/45
monitoring	2/9
multiplexers	7/9
networks	5/51
non-contact thermometers	6/23
nuclear plant instrumentation	2/25
nuclear qualification	2/31
occupational safety	8/33, 10/9, 10/34, 10/49
open-channel flow	4/61
operator interfaces	3/53, 12/47
optimization	9/103
oxygenated compounds	4/65
personal computers	9/113, 11/41
photoionization detectors	4/65
plant availability	9/87
plant-wide automation	7/59, 9/103
pollution	8/33
power plant automation	9/87
prepackaged instrumentation	11/49
pressure	4/51, 5/9, 9/113, 10/9, 10/34
pressure transducers	8/49
pressure transmitters	4/31
process computers	5/43, 9/109, 12/47
process performance	2/19
product quality	9/103
programmable controllers	3/53, 5/43, 6/17, 9/109, 9/113, 12/9, 12/31, 12/37
programming	12/47
protective action	3/57
Proway	9/91
pulp and paper	4/23
pumps	2/41
